Re: Compliance Inspection
Stream Alteration Permit #92-91-11SA
After the Fact Permit to Restore the Price River

Dear Hank:

A compliance inspection for Stream Alteration Permit #92-91-11SA was conducted on April 20, 1993. The inspection verified completion of the revegetation requirements for the disturbed site, in addition to the regrading and installation of riprap that was completed on November 25, 1992.

Based on my observations, I find the project in compliance with Section 404 of the Clean Water Act and the specific conditions of the approved permit. Therefore, no additional work under this permit is required. However, this release does not waive any requirement from the Division of Oil, Gas & Mining. Should future repairs be necessary, or as new projects develop, I would encourage you to coordinate with this office prior to initiating any work.

Your continued cooperation in completing this project is appreciated. Should you have any questions, please feel free to contact me.

Sincerely,

William A. Warmack
